A workplace powered by you

At BC Hydro, we're working towards creating a cleaner and more sustainable future for all British Columbians and need people like you to help us. A career at BC Hydro is meaningful and provides you the opportunity to be part of a talented, inclusive, and diverse team. We offer a healthy work-life balance, competitive wages, a comprehensive benefits package, and training opportunities to support you in your career growth. We're proud to be ranked as one of B.C.'s Top Employers and one of Canada's Best Diversity Employers.

We invite you to join us as we build an even cleaner B.C. We welcome applications from all qualified job seekers. If you're a person with a disability, please let us know by emailing RecruitmentHelp@bchydro.com, as adjustments can be made to help support you in your application process.

Senior Environmental Coordinator

Number of positions: 1

Job Location: Terrace DO

Employment type: Temporary

Region: Various

Hours of work: Full-time (37.5 hrs/wk)

Flexible Work Role: Hybrid

Annual salary: $ 109,700.00 - 138,700.00

What you'll do

As a member of the dynamic North Coast Transmission Project team in this project delivery-oriented role you will provide environmental support, as environmental work package manager (EWPM), on complex BC Hydro capital projects.

The scope of the role includes supporting the Regulatory team in navigating federal and provincial environmental regulatory processes and preparing or managing the preparation of information related to potential environmental and socio-economic effects of projects.
EWPMs are responsible for the scope, schedule, budget, and costs associated with their work package. The EWPM is expected to have expertise, and a working knowledge of all, disciplines within the scope of the work package, consulting with subject matter experts as needed, while serving as the single environmental point of contact for their assigned scope of work.

Close collaboration with our Indigenous Relations (IR) counterparts is essential for developing accurate project schedules and appropriately scaling and delivering the respective scopes of work. To achieve this, the EWPM works closely with IR on tasks and deliverables (e.g. environmental plans, studies, and monitoring programs) with participating Indigenous communities.

In addition, this role will support strengthening our relationships with existing clients by working collaboratively on project teams, developing and/or delivering environmental training, and proposing new ways to better meet our clients' needs.

Applicants should be knowledgeable of relevant standards, policies, practices and procedures, and have the ability to exercise independent judgment in analysis and problem solving for highly complex and medium scope projects. Strong communication and leadership skills are essential, including the ability to adapt communication styles to suit different audiences, and anticipate questions or concerns in advance. All team members are expected to embody a "One Hydro" approach by supporting colleagues, contributing where needed, and coaching others in the application of business knowledge.

Duties may include, but are not limited to:

* Selecting, contracting and managing consultants, as/when required, to assist with the environmental scope of work, as appropriate during all project phases.

* Strategically advising project teams on internal recommendation documents, including budget requests, contract requests, alternatives evaluations, business cases, and overall environmental strategy.

* Writing or leading development of project environmental requirements, including appropriately- scaled assessments of potential project effects on fish and fish habitat, water quality and flow, wildlife, hazardous waste management, contaminated sites, socioeconomic interests, and archaeological and heritage resources.

* Advising project teams on ways to assess and address Indigenous, public, and stakeholder concerns around project environmental risks.

* Liaising/negotiating with regulators as required and advising project teams on environmental requirements and potential conditions of regulatory approvals.

* Providing consistent advice and assistance to project teams on compliance with environmental aspects of BC Hydro's systems and procedures such as Project Portfolio Management (PPM), incident reporting, and compliance audits.

* Pro-actively managing own time to prioritize and oversee project environmental risks across an array of capital projects at various stages of planning or implementation.

* Other Environment, Senior Environmental Coordinator, and/or EWPM-related duties as required or as assigned by your manager.

What you bring

* A degree relevant to planning, environmental assessment and permitting, natural resources, engineering, geoscience, or an equivalent combination of education and experience.

* The successful candidate must have the appropriate professional designation in British Columbia (e.g., RP.Bio, P.Ag, P. Eng, P. Geo.). Due to the technical nature of the work, this is a requirement of the position under the Professional Governance Act of BC.

* Minimum of eight years of experience in progressively more responsible positions in the environmental field.

* Must hold a valid class five (5) driver's license.

* Project management courses and certification will be considered a strong asset.

* Ability to manage relationships with all various levels of enterprise-wide leadership (employees to executives) and external clients and stakeholders.

* Well developed communication, facilitation, negotiation and interpersonal skills.

* Well developed planning, organizational, analytical and problem-solving skills.

* Experience working with environmental regulators, Indigenous communities, and/or the public, and with multi-disciplinary teams.

* Experience predicting, defining, and managing the environmental risks of large-scale capital projects and programs.

* Availability for occasional travel, sometimes to remote locations and outside normal working hours.

* Must be able to be authorized for both BC Hydro Power System Safety Protection (PSSP) and Work Protection Practices (WPP).

What we offer

- A comprehensive benefits package
- A minimum of 15 paid vacation days
- A lifetime pension
- Flexible work model, depending on your role type
- Training and development courses

For more information on the benefits we offer, visit bchydro.com/benefits.

What else you should know

* This is a M&P, Group 44 full-time temporary (FTT) opportunity for approximately 2 years.

* This position may be based at one of BC Hydro's offices in Terrace, Smithers, Prince George, or Burnaby (Edmonds), depending on operational requirements and workspace availability. The final office location will be discussed further during the recruitment process. While BC Hydro works to secure permanent office space for the successful candidate, the role may initially be performed remotely. Once office space has been secured, employees will be expected to work from the designated office location a minimum of three days per week.

* As part of the selection process, applicants may be required to complete a written test/assessment and/or a presentation as part of the interview process.

* Please note there will be some occasional travel required in this role around the province.

* A condition of employment in this role is that you maintain your Class 5 Driver's License in good standing.

Don't forget to update your Candidate Profile with your current resume and copies of your certifications. If applicable, include your Trades Qualification. This will ensure we have all the necessary information to assess your application without any delays.

Location: Terrace, British Columbia, Canada, V8G 1L1.
