Registered Professional Biologist (RPBio)

Contract – Report Review and Project Support

Location: Fort St. John, BC (remote work only)
Start: Immediate (first assignment: early November 2026)
Type: Contract / subcontract, as needed
Rate: Contract rate, based on experience

ABOUT US

Eco-Can Environmental is an environmental consulting firm based in Fort St. John. We work with First Nations and industry clients across northeast BC on environmental assessments, wildlife monitoring, referrals review and land-use planning.

THE OPPORTUNITY

We are looking for a practising RPBio to provide independent professional review and sign-off on environmental reports, and to support our team on project review and planning. The work is flexible and can be done mostly remotely.

RESPONSIBILITIES

- Review the scope, methods, data sources and draft report, and provide technical comments.
- Confirm that conclusions on ecological values, effects and mitigation are supported, and work with the authors on revisions.
- Sign off as the responsible RPBio once satisfied with the report.
- Provide technical guidance on future assessments, referrals and project planning in northeast BC, as needed.

QUALIFICATIONS

- Registered Professional Biologist (RPBio) in good standing with the College of Applied Biologists, with a practice scope that covers terrestrial ecology, wildlife and wetlands.
- Experience in northeast BC (Peace region), including environmental assessment, oil and gas or seismic activity, and ecological effects and mitigation.
- Experience preparing or reviewing environmental impact assessments or similar technical reports.
- Experience working with First Nations communities is an asset.
- Professional liability insurance is an asset.

How to apply: Email your CV, College registration number, availability for the first week of November and hourly rate to Joel David at careers@ecocanenviro.com with the subject line "Contract RPBio". Questions: 825-982-8886.

Open until filled. Applications are reviewed as received.
